Professional Summary

Final year Information Science Engineer with 150+ LeetCode problems solved and hands-on experience building production-grade AI systems. Proven track record of shipping end-to-end projects combining event-driven microservices, agentic RAG pipelines (LangGraph), vector databases (Qdrant), and real-time data streaming (Kafka). Experienced in REST API design, cloud deployment, and LLM integration through an internship at MoneyChoice Capital (California, USA).

Education

Sir M. Visvesvaraya Institute of Technology

B.E. in Information Science and Engineering, CGPA: 8.2

Relevant Coursework: Data Structures & Algorithms, DBMS, OOPs, Computer Networks, Operating Systems, Artificial Intelligence

Bengaluru

2023 – 2027

Experience

MoneyChoice Capital

AI Analytics Intern

Mar 2026 – Jun 2026

California, USA (Remote)

- Engineered an end-to-end WhatsApp automation pipeline using n8n (DAG-based orchestration) and OpenClaw, enabling fully event-triggered investor outreach with zero manual intervention; reduced outreach effort by 100%.
- Designed and deployed a LinkedIn outreach microservice using Playwright and FastAPI with fault-tolerant session management and retry logic; hosted on Ubuntu VPS via pm2.
- Integrated Google Sheets as a live CRM layer within n8n workflows and leveraged the Claude AI API (Anthropic) for LLM-powered message personalization across the full automation pipeline.

Technical Skills

Languages: Python, C, C++, SQL

Core CS: Data Structures & Algorithms, OOPs, DBMS, Computer Networks, OS, System Design

GenAI & Agents: LangGraph, LangChain, Agentic RAG, Corrective RAG, Google Gemini API, Claude AI API

Backend & APIs: FastAPI, Flask, REST API Design, WebSockets, APScheduler, Scikit-Learn, Pandas, NumPy

Databases: PostgreSQL (Supabase), MongoDB, Qdrant (Vector DB), FAISS

Caching & Streaming: Redis (Semantic Cache), Apache Kafka, Event-Driven Architecture

DevOps & Cloud: Git, GitHub Actions, Render Cloud, Vercel

Projects

GridOps – Hyperlocal Dark Store Intelligence Agent | FastAPI, LangGraph, Gemini, Qdrant, Kafka, Redis

[GitHub](#) | [Live Demo](#)

Aug 2026

- Built a production-grade, event-driven AI system monitoring real-time inventory across 10 dark stores (Zepto, Blinkit, Instamart) and 50 SKUs using a 4-agent LangGraph pipeline (Router → Retriever → Reviewer → Synthesizer) with Corrective RAG retry loops to autonomously predict stockout risks before they occur.
- Engineered an Apache Kafka (Upstash) event ingestion pipeline where a Python worker consumes inventory events, computes stockout hours, generates Gemini embeddings, and upserts into Qdrant Cloud with hybrid dense + BM25 sparse search; implemented Redis semantic cache at 0.97 cosine similarity threshold, reducing agent latency from 4,000ms to 80ms (98% reduction).
- Logged every agent step, latency, cache hit rate, and reviewer score to Supabase PostgreSQL; exposed a /metrics observability endpoint and deployed the full system on Vercel and Render with Supabase Auth-protected routes.

RAGTube – GenAI Video Teaching Assistant | Python, LangChain, Gemini API, FAISS, Flask | [GitHub](#)

Jan 2026

- Architected a RAG pipeline enabling users to chat with YouTube videos using FAISS for semantic vector search and Gemini for context-aware, timestamped responses to educational queries.
- Engineered a Flask REST backend to process and chunk video transcripts in real time, enabling precise retrieval-augmented answers at scale.

LoanRepay – AI-Powered Credit Risk System | Scikit-Learn, Flask, Render Cloud, Pandas | [GitHub](#) | [Live Demo](#)

Nov 2025

- Deployed a live end-to-end ML application on Render Cloud predicting loan default probabilities, serving real-time risk scores via a RESTful Flask inference API to financial decision-makers.
- Trained a classification model on real-world financial data using Scikit-Learn and Pandas; designed a responsive dashboard for real-time credit risk visualization.

Achievements & Certifications

- Ranked in the top 2.5% of competing teams at CTF 24-Hour Coding Challenge for rapid problem-solving across cryptography and logic challenges (2025).
- Completed Data Analytics Job Simulation by Deloitte, focused on data modeling, analysis pipelines, and client communication (2025).

Leadership & Co-Curricular

Theatre Club, Sir MVIT – Core Team Member

2023 – Present

- Earned 2nd Position at inter-college competitions across 4 Bengaluru institutions (BMS College, NMIT, Atria, Presidency University) in front of 500+ audiences.
